

# PayPal Google Pay 支付集成指南

- 用户按本指南操作后可使用 PayPal Google 收付款服务及相关功能, PayPal Google 收付款服务及相关功能属于 PayPal 全球服务 (定义如下)。用户需要首先在 PayPal 运营的中国网站 ([Paypal.cn](#)) 上接受 [PayPal 中国跨境支付服务用户协议](#) 并注册 PayPal 账户, 以进一步申请相关服务。PayPal 全球服务由我们合作的 PayPal 关联企业为您提供, 遵循并受到 “[PayPal 全球条款](#)” 的约束
- 本指南包含的全部产品交互示意图均为参考目的而展示, 用以阐释本指南之步骤引导。所有 PayPal 产品和服务均根据适用的 PayPal 用户协议、条款和政策按现状提供。

## 1. 所需 SDK/API

集成此按钮所需的 SDK/API 如下:

- PayPal JS SDK: [PayPal JS SDK](#)
- Server SDK: [Server SDK](#) (Server SDK 目前支持的编程语言包括 PHP、Java、.Net、Python、Ruby 和 TypeScript)。
- API: [PayPal API](#)

## 2. 按钮效果展示

### 3. Google Pay 支付按钮集成步骤：

#### 步骤 1：开通账户的 Google Pay 支付功能

具体请参见附录中的[详细步骤](#)。

#### 步骤 2：加载 PayPal JS

```
<script src="https://www.paypal.com/sdk/js?client-
id=YOUR_CLIENT_ID&currency=USD&merchant-
id=SUB_MERCHANT_ID&components=googlepay"></script>
```

查看 merchant id 和 client id 以及查看 Google Pay 权限的步骤请参见附录。

#### 步骤 3：加载 Google JS

```
<script async src="https://pay.google.com/gp/p/js/pay.js"
onload="onGooglePayLoaded()"></script>
```

#### 步骤 4：加载 Google Pay 按钮

```
    /**
     * Function onGooglePayLoaded()
     */
    const paymentsClient = getGooglePaymentsClient();
    paymentsClient.isReadyToPay(isReadyToPayRequest)
        .then(function(response) {
            if (response.result) {
                addGooglePayButton();
            }
        })
        .catch(function(err) {
            console.error(err);
        });
}

/**
 * Add a Google Pay purchase button
 */
function addGooglePayButton() {
    const paymentsClient = getGooglePaymentsClient();
    const button =
        paymentsClient.createButton({
            onClick: onGooglePaymentButtonClicked /* To be defined later */,
            allowedPaymentMethods: [baseCardPaymentMethod]
        });
    document.getElementById('container').appendChild(button);
}
```

#### 步骤 5：监听 Google Pay 按钮点击事件

点击 Google Pay 按钮时，会触发 onGooglePaymentButtonClicked 函数。

```
1 /* Show Google Pay payment sheet when Google Pay payment button is clicked */
2 async function onGooglePaymentButtonClicked() {
3   const paymentDataRequest = await getGooglePaymentDataRequest();
4   const paymentsClient = getGooglePaymentsClient();
5   paymentsClient.loadPaymentData(paymentDataRequest);
6 }
```

## 步骤 6：配置 Google PaymentDataRequest 对象

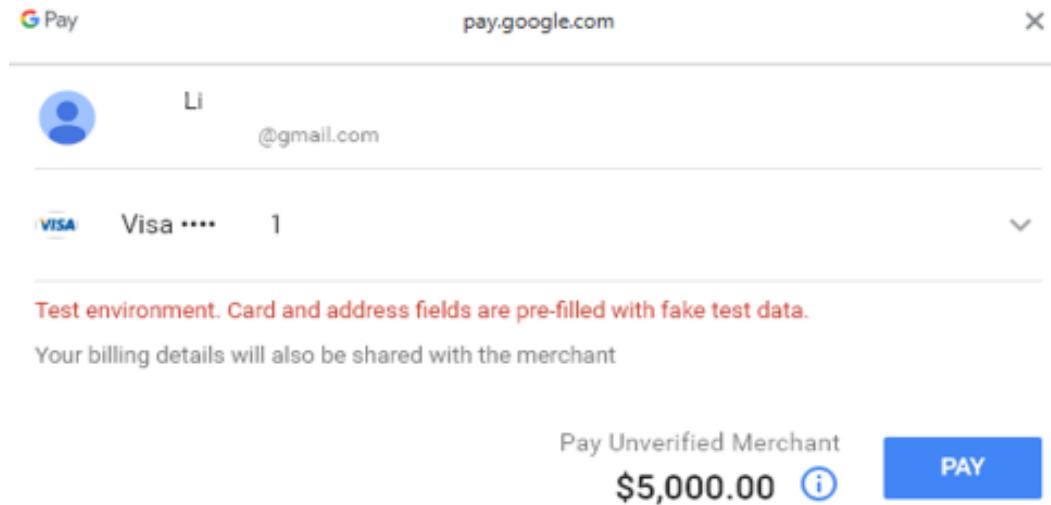

在 onGooglePaymentButtonClicked 函数中，配置

Google paymentDataRequest 对象。详细信息请参考 [Google Pay 文档](#)。

```
2 async function getGooglePaymentDataRequest() {
3   const googlePayConfig = await paypal.Googlepay().config();
4   const paymentDataRequest = Object.assign({}, baseRequest);
5   paymentDataRequest.allowedPaymentMethods = googlePayConfig.allowedPaymentMethods;
6   // Uncomment for Japan integrations only
7   // paymentDataRequest.allowedPaymentMethods[0].parameters.allowedAuthMethods = ['PAN_ONLY'];
8   paymentDataRequest.transactionInfo = getGoogleTransactionInfo();
9   paymentDataRequest.merchantInfo = googlePayConfig.merchantInfo;
10  paymentDataRequest.callbackIntents = ["PAYMENT_AUTHORIZATION"];
11  return paymentDataRequest;
12 }
13 function getGoogleTransactionInfo(){
14   return {
15     currencyCode: 'USD',
16     totalPriceStatus: 'FINAL',
17     totalPrice: '100.00' // Your amount
18   }
19 }
```

## 步骤 7：测试 Google Pay

点击 Google Pay 按钮后，成功弹出支付窗口。

在 sandbox 环境下测试 Google Pay，需要加入测试组，Google 账号上会自动生成测试账号。

1. 访问 [Google Pay 测试卡套件](#)
2. 点击 "Test card suite group"

We recommend that you test your integration before you take it live. To do so, add your email to our [test card suite group](#). This sets up your account so that when you open the payment sheet with the environment variable set to 'TEST', you see a suite of test cards instead of the cards associated with your account in production.

This suite is intended to help you complete the [integration checklist](#) to streamline the approval process in our [Google Pay & Wallet Console](#) so that you can [request production access](#).

You're free to leave or join our [test card suite group](#) as needed. To leave, select [My membership settings](#) and click [Leave group](#).

## 步骤 8：处理支付授权

点击 Google Pay 支付页面上的 "Pay" 按钮时，会触发 `onPaymentAuthorized` 函数。

```

function onPaymentAuthorized(paymentData) {
    return new Promise(function (resolve, reject) {
        processPayment(paymentData)
            .then(function (data) {
                resolve({ transactionState: "SUCCESS" });
            })
            .catch(function (errDetails) {
                resolve({ transactionState: "ERROR" });
            });
    });
}

```

## 步骤 9：调用 PayPal API

```

async function processPayment(paymentData) {
    try {
        const { currencyCode, totalPrice } = getGoogleTransactionInfo();
        const order = {
            intent: "CAPTURE",
            purchase_units: [
                {
                    amount: {
                        currency_code: currencyCode,
                        value: totalPrice,
                    },
                },
            ],
        };
        /* Create Order */
        const { id } = await fetch('/orders', {
            method: "POST",
            headers: {
                "Content-Type": "application/json",
            },
            body: JSON.stringify(order),
        }).then((res) => res.json());
        const { status } = await paypal.Googlepay().confirmOrder({
            orderId: id,
            paymentMethodData: paymentData.paymentMethodData,
        });
        if (status === "APPROVED") {
            /* Capture the Order */
            const captureResponse = await fetch(`/orders/${id}/capture`, {
                method: "POST",
            }).then((res) => res.json());
            return { transactionState: "SUCCESS" };
        } else {
            return { transactionstate: "ERROR" };
        }
    } catch (err) {
        return {
            transactionstate: "ERROR",
            error: {
                message: err.message,
            },
        };
    }
}

```

Create Order

Confirm Order

Capture Order

## I. 获取访问令牌

调用获取访问令牌 API: [获取访问令牌](#)

## II. 创建订单

调用 Create Order API: [Create Order API](#)

必传项:

- 商品详情: 商品详情必填 purchase\_units.items[]

[https://developer.paypal.com/docs/api/orders/v2/#orders\\_create!path=purchase\\_units/items&t=request](https://developer.paypal.com/docs/api/orders/v2/#orders_create!path=purchase_units/items&t=request)

- 实体商品 :

- 商品种类选择实体商品 purchase\_units.items[].name. category= PHYSICAL\_GOODS

[https://developer.paypal.com/docs/api/orders/v2/#orders\\_create!path=purchase\\_units/items/category&t=request](https://developer.paypal.com/docs/api/orders/v2/#orders_create!path=purchase_units/items/category&t=request)

- 地址必传 purchase\_units.shipping

[https://developer.paypal.com/docs/api/orders/v2/#orders\\_create!path=purchase\\_units/shipping&t=request](https://developer.paypal.com/docs/api/orders/v2/#orders_create!path=purchase_units/shipping&t=request)

- 非实体商品:

- 商品种类选择非实体商品 purchase\_units.items[].name. category= DIGITAL\_GOODS

[https://developer.paypal.com/docs/api/orders/v2/#orders\\_create!path=purchase\\_units/items/category&t=request](https://developer.paypal.com/docs/api/orders/v2/#orders_create!path=purchase_units/items/category&t=request)

- 传 shipping\_preference = NO\_SHIPPING

[https://developer.paypal.com/docs/api/orders/v2/#orders\\_create!path=payment\\_source/paypal/experience\\_context/shipping\\_preference&t=request](https://developer.paypal.com/docs/api/orders/v2/#orders_create!path=payment_source/paypal/experience_context/shipping_preference&t=request)

### III. 确认订单

如果需要 3DS 验证，在此步骤调用 Show Order Details API 获取订单详情：[Show Order Details API](#)。详细文档请参考：[强客户认证 \(SCA\)](#)

### IV. 捕获订单

调用 Capture Order API：[Capture Order API](#)

#### 步骤 10：处理支付结果

根据 Capture API 返回的信息判断交易是否成功，然后跳转到成功/失败页面（该页面为商家页面）。

#### 步骤 11：处理异步通知 Webhooks

如果 PayPal Capture API 首次返回的交易状态为 Pending，根据 Webhooks 来更新最终交易状态。Webhooks 文档：[Webhooks](#)

## 4. 参考文档

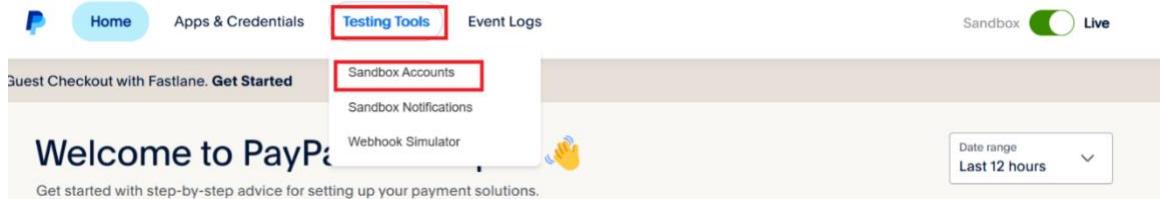

- Google Pay 支付文档：[Google Pay 支付文档](#)
- API 文档：[PayPal API 文档](#)
- Server SDK：[PayPal Server SDK](#)

## 5. 附录

### 创建 sandbox 商家 Business 账号步骤

1. 访问 [PayPal 开发者主页](#)
2. 点击右上角的 "Log In"
3. 使用真实的 PayPal 收款账号登录

4. 点击 "Testing Tools" 下的 "Sandbox Accounts"

5. 点击 "Create account"

6. 选择 "Business", 选择 "China" 后点击 "Create Account" (如果需要创建 Sandbox 买家账号, 在此步骤选择 "Personal", 国家选择非 China。)

Create Sandbox Account

Choose your account type and country that will be used for live payments.

Account type:

**Personal**  
Buyer account

**Business**  
Merchant account

Country/Region:

Country or region  
China

**Create Account**

Do you want a more customized account? [Create](#)

## 修改 Sandbox 密码步骤

1. 访问 [PayPal 开发者主页](#)
2. 点击右上角的 "Log In"
3. 使用真实的 PayPal 收款账号登录
4. 点击 "Testing Tools" 下的 "Sandbox Accounts"
5. 找出需要更换密码的 Sandbox 账号, 点击最右边的 "View/Edit"

<input type="checkbox"/> sb-nq4oe15362897@business.example.com	Business	C2	11/20/24, 9:09 AM	<input type="button" value="..."/>
<input type="checkbox"/> sb-bv43xx33885946@personal.example.com	Personal	US	11/8/24	<input type="button" value="View/Edit account"/>

6. 点击 "Change Password" 修改密码

**sb-ovwza31914289@business.example.com**

### Login Info

Sandbox URL	<a href="https://sandbox.paypal.com">https://sandbox.paypal.com</a>	<input type="button" value="Copy"/>
Email	sb-ovwza31914289@business.example.com	<input type="button" value="Copy"/> <a href="#">Change email</a>
Password	.....	<input type="button" value="Change password"/>

## 创建 REST APP 步骤

1. 访问 [PayPal 开发者主页](#)
2. 点击右上角的 "Log In"
3. 使用真实的 PayPal 收款账号登录
4. 点击 "App & Credentials" (注: 右上角可以切换 Sandbox/Live 环境下创建)

The screenshot shows the PayPal developer portal interface. At the top, there's a navigation bar with tabs: Home, Apps & Credentials (which is highlighted with a red box), Testing Tools, and Event Logs. To the right of the tabs is a 'Sandbox' toggle switch, which is currently set to 'Sandbox' (indicated by a blue circle). Below the navigation bar, there's a message: 'Get up Guest Checkout with Fastlane. Get Started'. Underneath this, a purple bar says 'You're in sandbox mode.'. The main content area is titled 'API Credentials'. On the right side of this title, there's a 'Create App' button. At the bottom of the page, there's a yellow bar with the text 'Viewing sandbox API credentials. [View live credentials](#)'.

5. 点击 "Create App"
6. 输入 App 名称 (只要不重复, 可以随意命名), 选择上面刚刚创建的 Sandbox Business 账号

App Name  
Standard

Type:

**Merchant**  
Accept payments as a merchant (seller)

**Platform**  
Move payments to sellers as a platform (marketplace, crowdfunding, or e-commerce platform)

Sandbox Account:

Sandbox Business Account  
sb-nq4oe15362897@business.example.com (... ▾)

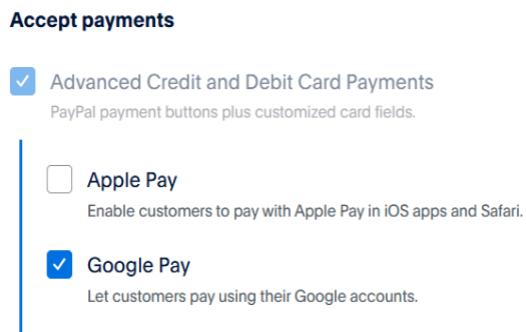

By clicking the button below, you agree to [PayPal Developer Agreement](#) (US accounts only).

**Create App**

7. 点击 "Create App"，获取 clientid 和 secret

## Sandbox 账户开通 Google Pay 权限

1. 在创建好的 sandbox App 页面，找到 Features->Accept Payments
2. 勾选 Google Pay

3. 点击 Save Changes

## Live 账户开通 Google Pay 权限

1. 使用真实 PayPal 账号登录 [PayPal 主页](#)
2. 点击 “商家工具”
3. 点击 “PayPal Checkout”

The screenshot shows the 'Business Tools' section of the PayPal website. At the top, there are tabs for '主页' (Home), '交易记录' (Transactions), '收付款' (Send & Receive), '市场营销' (Marketing), and '商家工具' (Business Tools), with '商家工具' being the active tab and circled in red. Below the tabs, the page title is '商家工具'. On the left, there's a section titled '接受付款' (Accept Payments) with a sub-section for 'PayPal Checkout'. A large button labeled '立即开始' (Get Started) is highlighted with a red circle. To the right, there's another section for '循环付款管理平台' (Recurring Payment Management Platform) with a purple circular icon.

#### 4. 点击“立即开始”

This screenshot shows the 'PayPal Checkout' setup page. At the top, there's a 'PayPal Checkout' logo and a sub-section for '接受在线付款' (Accept Online Payments). A large '立即开始' (Get Started) button is circled in red. Below it, there's a preview of how the payment interface will look on a website, showing a coffee product for \$29.99.

#### 5. 点击有定制网站下面的“选择”

This screenshot shows the 'Set up your website to accept payments' page. It features two main options: '有定制网站?' (Have a custom website?) and '设置付款链接和按钮' (Set up payment links and buttons). The first option has a '选择' (Select) button circled in red. The second option has an '立即设置' (Set up now) button.

#### 6. 点击“获取高级版”

7. 输入信息后，“同意并提交”
8. 已获准使用 Google Pay 的权限

### 查看 Merchant ID 步骤：

1. Sandbox – 访问 [www.sandbox.paypal.com](http://www.sandbox.paypal.com)，使用收款的 sandbox 账号登录；Live - 访问 [www.paypal.com](http://www.paypal.com)，使用真实 PayPal 收款账号登录
2. 点击右上角 Account Settings
3. 点击左手边 Business Information

The screenshot shows the 'Business Information' page in the PayPal account settings. The left sidebar has a 'Business information' link highlighted with a red box. The main content area shows the 'Business information' section with the 'PayPal Merchant ID' field containing 'T4RL8M2MDCXL'. The top right corner shows a user profile for 'John' with a 'Profile Settings' and 'Account Settings' link, both of which are highlighted with red boxes.
